

Hello my dear friends

Welcome back to Easy English The Podcast

This is the place where you learn English slowly and clearly

My name is Zain

And I am very happy you are here today

Let me ask you something honest

Do you listen to English every day

But you still feel confused

Do you watch English videos

Or listen to podcasts

But your mind feels tired

Do people speak English

And you understand some words

But not the full meaning

If this feels familiar

You are not weak

And you are not bad at English

You are just missing one simple skill

That skill is called active listening

Today I will help you learn this skill

In a very easy and calm way

No hard grammar

No difficult words

Only simple clear English

In this episode

I will guide you step by step

With easy examples from daily life

You will listen calmly

You will think clearly

And you will feel more confident

So please relax

Take a slow deep breath

Put your phone away

Find a quiet place
And give yourself a few peaceful minutes
Because this time is only for you
And your English learning journey
Now let's begin together

Now let's start with technique number one
This technique is very simple
But it is very powerful
It is called predict before you listen
Predict means to guess
You make a small guess before listening
Before you press play
Stop for a few seconds
And think calmly
Ask yourself one easy question
What is this about
This question wakes up your brain
Your mind becomes active
You are ready to listen
Let me give you a simple example
Imagine you will listen to a podcast about food
Before listening
You can think
Maybe I will hear words about cooking
Maybe I will hear names of food
Maybe I will hear words like sweet or spicy
Now your brain is ready
When you hear these words
You understand them faster
Here is another example
You are going to watch a video about travel
Before the video starts
Think for a moment

Will I hear words like airport or ticket
Will I hear words like hotel or journey
Even if your guess is not correct
It is completely okay
The important thing is thinking before listening
This small habit helps a lot
Your brain works better
Your listening becomes easier
Your confidence slowly grows
So remember this
Do not listen in a hurry
Take a short moment
Predict before you listen
And enjoy the learning process

Technique number 2

Now let's move to technique number two
This technique is very important for English learners
It is called listen for the main idea
Many learners try to understand every word
This makes listening very hard
And very stressful
But here is the truth
You do not need to understand every word
To understand English
The main idea is more important
The main idea means the big message
It means what the speaker wants to say
When you listen
Ask yourself one simple question
What is the speaker talking about
Focus on the topic
Focus on the meaning

Not on every single word
Let me give you an easy example
Someone says
I did not go outside because I felt sick
Maybe you do not know one word
But you still understand the idea
The person stayed home
Because they were not feeling well
That is enough
Another example
The speaker says
There was a problem at work
But everything is okay now
You understand the message
First there was a problem
Now the problem is finished
You do not need more details
This is how good listeners listen
They stay calm
They keep listening
They do not stop for every new word
If you understand fifty or sixty percent
That is very good
Over time
Your understanding will grow
Your brain will learn faster
So remember
Listen for the main idea
Stay relaxed
And keep going

Technique number 3

Now let's talk about technique number three

This technique is very powerful
Listen more than one time
Many learners listen one time
Then they stop
And say this is too hard
But learning does not work like that
The first time you listen
Your brain hears the sounds
Your brain meets the voice
The speed
And the accent
This is normal
The second time you listen
Your brain feels more comfortable
You understand more words
You understand more meaning
The third time
You feel confident
You notice small details
This is how learning happens
Little by little
Think about music
When you hear a song many times
You start to remember it
English works the same way
So do not feel bad
If you do not understand the first time
This is natural
Good learners listen again
And again
You can pause
You can repeat
You can listen slowly
Each time

Your brain becomes stronger
Your listening becomes easier
Your confidence grows
So remember this rule
One time is not enough
Two or three times is much better

Technique number 4

Now let's move to technique number four
This technique is very important
And very helpful for English learners
It is called using context
Context means the words around
The situation
And the idea of the sentence
When you listen to English
You will hear new words
This is normal
You do not need to know every word
When you hear a new word
Do not stop
Do not feel scared
Do not close the video
Just keep listening
Look at the other words
Listen to the full sentence
Think about the situation
Your brain will help you
Let me give you a simple example
I was very hungry
So I ate a big sandwich
Maybe you don't know one word
But you understand the idea

Hungry

Food

Eating

So the meaning becomes clear

Here is another example

We stayed inside

Because it was raining a lot

Even if one word is new

You understand the story

Outside

Rain

Staying inside

This is using context

You use the story to understand

Not the dictionary

Native speakers do this too

Even in your own language

You guess meanings like this

So trust your brain

It is smart

When a word is really important

You can check it later

But while listening

Keep going

Stay calm

Focus on the message

This habit will make you a strong listener

Over time

Your vocabulary will grow

And listening will feel easier

Technique number 5

Now let's talk about technique number five

This technique is very important
Many learners ignore this
But it makes a big difference
This technique is called
Stay focused and don't multitask
Multitasking means
Doing many things at the same time
For example
Listening to English
While checking your phone
Watching a video
While thinking about something else
Or listening to English
While scrolling social media
This may feel useful
Because you think you are saving time
But in real learning
Multitasking does not help
When you multitask
Your brain is divided
It cannot focus fully
You hear sounds
But you don't understand meaning
You forget quickly
And learning becomes slow
Language learning needs attention
Your brain needs calm focus
So what should you do
Create a small English time
Even ten minutes is enough
In that time
Do only one thing
Listen to English
No phone

No messages
No distractions
Just you and the sound
Sit comfortably
Or lie down calmly
Listen with your full attention
Think about the speaker
Think about the meaning
If your mind moves away
Bring it back gently
This is normal
Focus is a skill
And skills grow with practice
Think about a real conversation
When a friend speaks
You look at them
You listen carefully
You don't check your phone
Do the same with English
Respect your learning time
Give English your attention
Even a few focused minutes every day
Will improve your listening
Your understanding will grow
And English will start to feel easier
So remember
Don't rush
Don't multitask
Stay calm
Stay focused
This is how good listeners learn deeply
This is so important
This is short summary of this lesson

Today you learned how to listen to English in a better way
You learned that listening is not only hearing words
It is about understanding ideas
First you learned to predict before listening
This helps your brain get ready
Second you learned to listen for the main idea
You do not need to understand every word
Third you learned to listen more than one time
Each time your understanding becomes better
Fourth you learned to use context to guess new words
The story helps you understand meaning
Fifth you learned to stay focused and not multitask
Even a few focused minutes are very powerful
If you practice these techniques every day
Your listening will improve
Your confidence will grow
And English will feel easier for you

Now it is time to practice listening
Please relax and listen carefully
You do not need to repeat
Just listen and understand
This practice will help your brain
Listen slowly and calmly

Every day we hear many sounds
Some sounds are clear
Some sounds are confusing
English can feel the same
Sometimes English sounds easy
Sometimes English sounds difficult

When you listen to English

Your brain is learning
Even if you do not notice it
Your brain connects sounds
Your brain connects meaning
This takes time
And that is normal

Imagine you are sitting quietly
You are listening to a calm voice
The voice is slow and clear
There is no pressure
There is no test
You are safe here

Listening is not about speed
Listening is about focus
You do not need to hurry
You do not need to understand everything
You only need to stay calm

Now think about your daily life
You wake up in the morning
You hear sounds around you
You hear birds
You hear traffic
You hear people talking

Your brain understands these sounds
Without effort
Without stress
English listening can become the same
With practice and patience

Now imagine you are walking outside

You see people moving
You hear small conversations
Some words are clear
Some words are not
But you still understand the situation

This is how listening works
You understand the idea
Not every word
This is good listening

Many learners stop listening
When they hear a new word
But good listeners continue
They stay relaxed
They stay focused

Now imagine someone is talking about their day
They say they woke up early
They say they felt tired
They say they drank some tea
You understand the story

Maybe some words are new
But the meaning is clear
This is success
This is progress

Listening is like a journey
At first it feels slow
At first it feels unclear
But step by step
It becomes easier

Now listen to this idea
English is not a subject
English is a sound
English is a flow
English is a rhythm

When you listen often
Your ears learn the rhythm
Your brain learns the flow
This happens naturally

You do not need to force it
You only need time
You only need practice

Now imagine you are listening to a friend
Your friend speaks slowly
Your friend speaks calmly
You feel comfortable
You feel relaxed

This is how you should feel
When listening to English
Not nervous
Not afraid

Now think about a simple situation
Someone says they are hungry
Someone says they will eat
You understand the meaning
Even if words are simple

Simple English is powerful
Simple English is enough

You do not need difficult words
To understand ideas

Now listen to your breathing
Slow and calm
This helps your listening
A calm body
Creates a calm mind

When your mind is calm
Listening becomes easier
Understanding becomes clearer

Now imagine you are listening again
The same audio
The same voice
This time it feels easier

This is improvement
This is learning

Listening again is not weakness
Listening again is smart
Each time you listen
Your brain learns more

Now think about confidence
Confidence grows slowly
Confidence grows quietly
Listening helps confidence

When you understand more
You feel stronger
You feel happier

You feel proud

You are doing something good

You are learning a new skill

This takes courage

Now imagine listening every day

Only ten minutes

Only calm listening

No phone

No distraction

This small habit

Can change your English

Day by day

Some days feel easy

Some days feel hard

Both are normal

Do not stop

Do not give up

Keep listening

Now think about the future

One day English will feel natural

One day English will feel friendly

One day you will understand more

That day comes

Because of practice

Because of patience

Right now
You are training your ears
You are training your brain

This listening practice
Is helping you
Even if you feel nothing

Learning is silent
Learning is slow
But learning is real

Now stay with the sound
Stay with the voice
Let English flow

You do not need to answer
You do not need to speak
Just listen

Listening is enough
Listening is powerful

You are doing great
You are learning
You are moving forward

Keep listening
Keep believing
And keep going
